

KOLEJ PROFESIONAL MARA BERANANG

DIPLOMA IN COMPUTER SCIENCE

COURSE NAME	: WEBSITE APPLICATION DEVELOPMENT
COURSE CODE	: CSC2713
ACADEMIC SESSION	: 3 2023/2024
TYPE OF ASSESSMENT	: Final Project
DURATION	: 26/01/2023 – 23/02/2023

CLO 2: Build a dynamic website based on web framework (C3,PL02)

INSTRUCTION TO CANDIDATES:

1. Late submissions after given due date will not be accepted.
2. Report should be written in using:
Font type: Arial
Size: 11 pts
Line Spacing: 1.5
3. Upload your project in MS-Teams and submit report in hardcopy
4. Present your project

Scenario

A dynamic website is a type of website that generates webpages and content in real-time, typically in response to user interactions or inputs. It uses various technologies and server-side scripting languages to deliver content that can change dynamically based on user actions or data from external sources. This can be done with ease using Django's framework that support server-side scripting language. The possibilities are endless, and with Django's powerful features at your fingertips, you can create a truly dynamic and interconnected website for your business or personal use.

Imagine you are building a website for :

- i. KPM Beranang Student Intervention Online System, where the system will allow lecturers, administration, and students to track the student problems and progress of intervention. OR
- ii. KPM Beranang Vehicle Management Online System, where the system will allow the lecturers, administration, and students to book and track the maintenance of the vehicle; van and bus.
- iii. KPM Beranang Student Release Management System, where the system will allow students to apply and track the records of applications, whereas mentor and administration will be able to track and update the application.

Requirement

Students need to develop website using Django framework. The website should have the following content and features:

- i. Registration
- ii. Post / Get/ Put / Delete Method (Database – minimum 3 tables)
- iii. Login / Logout
- iv. Search data

Tasks:

1. Describe the project overview. (Documentation)
 - a. Website name
 - b. Target audience/users
 - c. Objective of the website.
 - d. Website flow

2. Build a database with appropriate class(s) and attribute(s) for each class
3. Apply graphic (picture/image/video), form, and content to suit the website.
4. Apply Post, Get, Put and Delete methods for database operation.
5. Apply Django administrator site.
6. Produce a report and upload your Django project in Teams.
7. Demonstrate your website.

Assessment Rubrics:

Task	Mark					Mark Obtained
	1	2	3	4	5	
1. Describe the project overview. (Documentation)	<input type="checkbox"/> Appropriate website name and is displayed in all pages.	<input type="checkbox"/> Catchy, distinctive and easy to recall and is displayed in all pages.				
	<input type="checkbox"/> Able to identify the target users for the website.	<input type="checkbox"/> Able to explain the target user accessibility or tasks for the website.				
	<input type="checkbox"/> At least 2 purposes of the website are clearly stated.	<input type="checkbox"/> At least 3 purposes of the website are stated with sufficient explanation.	<input type="checkbox"/> At least 5 purposes of the website are stated with clear explanation.			
	<input type="checkbox"/> Adequate website flow is explained.	<input type="checkbox"/> Website flow is well explained and aligned with some of the purposes stated.	<input type="checkbox"/> Website flow is well explained and aligned with all purposes stated.			

Task	Mark					Mark Obtained
	1	2	3	4	5	
2. Build a database with appropriate class(s) and attribute(s) for each class	<input type="checkbox"/> At least 3 classes are created in models.py	<input type="checkbox"/> More than 3 classes are created in models.py				
	Apply the database in the website that include one (1) of the followings with appropriate: <ul style="list-style-type: none"> <input type="checkbox"/> class name (1 class) <input type="checkbox"/> attribute name for each class <input type="checkbox"/> datatype for each attribute <input type="checkbox"/> primary key for each class <input type="checkbox"/> foreign key 	Apply the database in the website that include two (2) of the followings with appropriate: <ul style="list-style-type: none"> <input type="checkbox"/> class name (1 class) <input type="checkbox"/> attribute name for each class <input type="checkbox"/> datatype for each attribute <input type="checkbox"/> primary key for each class <input type="checkbox"/> foreign key 	Apply the database in the website that include three (3) of the followings with appropriate: <ul style="list-style-type: none"> <input type="checkbox"/> class name (2 classes) <input type="checkbox"/> attribute name for each class <input type="checkbox"/> datatype for each attribute <input type="checkbox"/> primary key for each class <input type="checkbox"/> foreign key 	Apply the database in the website that include four (4) of the followings with appropriate: <ul style="list-style-type: none"> <input type="checkbox"/> class name (3 classes) <input type="checkbox"/> attribute name for each class <input type="checkbox"/> datatype for each attribute <input type="checkbox"/> primary key for each class <input type="checkbox"/> foreign key 	Apply the database in the website that include all of the followings in all created classes with appropriate: <ul style="list-style-type: none"> <input type="checkbox"/> class name <input type="checkbox"/> attribute name for each class <input type="checkbox"/> datatype for each attribute <input type="checkbox"/> primary key for each class <input type="checkbox"/> foreign key 	

Task	Mark					Mark Obtained
	1	2	3	4	5	
3. Apply graphic (picture/image/video), form, and content to suit the website theme.	<p>Website content should include one (1) the followings:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Content is simple and to the point. <input type="checkbox"/> Differences in type size and/or color are used well. <input type="checkbox"/> Content is fresh, original, insightful <input type="checkbox"/> Creative and logic <input type="checkbox"/> Content is presented in a clear manner that is easy to follow. 	<p>Website content should include two (2) the followings:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Content is simple and to the point. <input type="checkbox"/> Differences in type size and/or color are used well. <input type="checkbox"/> Content is fresh, original, insightful <input type="checkbox"/> Creative and logic <input type="checkbox"/> Content is presented in a clear manner that is easy to follow. 	<p>Website content should include three (3) the followings:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Content is simple and to the point. <input type="checkbox"/> Differences in type size and/or color are used well. <input type="checkbox"/> Content is fresh, original, insightful <input type="checkbox"/> Creative and logic <input type="checkbox"/> Content is presented in a clear manner that is easy to follow. 	<p>Website content should include four (4) the followings:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Content is simple and to the point. <input type="checkbox"/> Differences in type size and/or color are used well. <input type="checkbox"/> Content is fresh, original, insightful <input type="checkbox"/> Creative and logic <input type="checkbox"/> Content is presented in a clear manner that is easy to follow. 	<p>Website content should include all the followings:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Content is simple and to the point. <input type="checkbox"/> Differences in type size and/or color are used well. <input type="checkbox"/> Content is fresh, original, insightful <input type="checkbox"/> Creative and logic <input type="checkbox"/> Content is presented in a clear manner that is easy to follow. 	
	<p>Website page layout should include one (1) the followings:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Page layout is creative and effective <input type="checkbox"/> Layout are well organized <input type="checkbox"/> Simple and powerful navigation structures make 	<p>Website page layout should include two (2) the followings:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Page layout is creative and effective <input type="checkbox"/> Layout are well organized <input type="checkbox"/> Simple and powerful navigation structures make 	<p>Website page layout should include three (3) the followings:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Page layout is creative and effective <input type="checkbox"/> Layout are well organized <input type="checkbox"/> Simple and powerful navigation structures make 	<p>Website page layout should include four (4) the followings:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Page layout is creative and effective <input type="checkbox"/> Layout are well organized <input type="checkbox"/> Simple and powerful navigation structures make 	<p>Website page layout should include all the followings:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Page layout is creative and effective <input type="checkbox"/> Layout are well organized <input type="checkbox"/> Simple and powerful navigation structures make
